

Now You Can Change Your Life.

We've all been there. Diet after diet and no real weight-loss. You've tried Keto, Paleo, meal plans, online diets, raw food, vegetarian, vegan, blood type, detox, liquid, fasting, low-calorie, low-carb and low-fat. Even gastric band surgery isn't always successful.

Imagine not having to fight hunger pangs that can throw you off your diet and back on the weight-gain wagon. Imagine a better, healthier life and a positive impact on your overall wellbeing. You can achieve that dream with real results.

Clinical trials by the U.S. Food & Drug Administration showed patients on this amazing drug lost an average 15% of their body weight, with longer-term yields resulting in a weight loss of 30%!

Colorado Medical Health
Telehealth in Fort Collins, CO

Phone: 970.508.8833

Real Doctors. Real Medicine. Real Results!

Dedicated to Helping with Weight-Loss Management

At **Colorado Medical Health**, we are dedicated to helping you achieve your weight-loss goals. Our family owned and operated telehealth clinic based in beautiful Fort Collins, Colorado serves all of Colorado and offers a variety of weight-loss options centered around high-quality compounded Semaglutide and Tirzepatide medications. Medications produced with pharmaceutical grade ingredients from FDA licensed facilities.

Colorado Medical Health programs offer you only high-quality solutions shown to aid weight-loss. If you're struggling to lose weight, if you've tried everything and still not getting the results you desire, we're here to tell you, there's still hope, and it doesn't have to cost an arm and a leg to get the results you deserve.

How The Medication Works:

The doctor-prescribed, weekly treatment is a custom blended medication that is individually formulated for each patient. Every time we eat, a specific hormone is automatically released in our body that gives a feeling of fullness. The medicine targets the brain and mimics that full feeling, plus reduces appetite, slows stomach emptying and ultimately decreases your caloric intake.

Your body also has a "set point" which is the number on the scale your weight normally hovers around. The treatment plan creates a new, lower set point after you lose your weight goal amount.

The Sad Facts On Obesity:

- 70% of Americans are overweight
- 1 in 3 of those are obese
- 42% of U.S. adults gained an average of 29 pounds during the COVID-19 pandemic
- Obesity increases risk for many serious diseases and health conditions
 - All causes of death (mortality)
 - High blood pressure
 - High HDL cholesterol, low HDL cholesterol or high levels of triglycerides
 - Type 2 diabetes
 - Coronary heart disease
 - Stroke
 - Sleep apnea
 - Many types of cancer

Our Patients Become Our Champions:

"I've tried every diet imaginable and always got hungry and gained the weight back. The medicine pays for itself in savings. I've lost 40 pounds in a year and weighed 115 this morning. Haven't seen that on the scale since high school."

-48 year-old housewife

"I never count calories or portion sizes now and still watch the weight melt off. My energy level is through the roof. The medicine keeps me full all the time and my portion sizes are way less. Can't believe my new wardrobe and the looks I get."

-26 year-old nurse

"The medicine is pure magic. Started at 182 pounds, 11 months later down to 142. We eat out almost every night. I had a cheeseburger and fries last night. My doctor was shocked at my latest blood work and pulled me off of three different prescription drugs. I've never felt better."

-69 year-old business owner
